Subject: RE: Is there anything you would like to see on the joint evaluation agenda?

Hmm. I was just looking at the new EnPPA framework and thinking about how to put down our next three years standards workplan - I'd like to just do a link rather than listing standards.

Do we know when the joint evaluation meeting is? We hope to have that new workplan, a result of our TSR, to you by June 30. So we should probably include the standards work plan. With 3&4 almost done we're moving into starting a lot of new criteria projects. So also would be interesting to hear anything you all might have on LNNC or chloride/sulfate in particular, in terms of timing.

We probably have to put wild rice on there, and where we think we are likely to need support as we move to implement - I would expect an increase in site-specific standards requests and we will also need to work on a variance framework for sulfate. And of course we'd like to know when you think you might finalize additions to the impaired waters list as we consider how that might impact us preparing the 2022 list and meeting your deadline for submittal.

That's all that comes to mind right now.
